

Jeremy Brown

Programmer Analyst | Full-Stack Developer | Systems Architect

Charlottetown, PE, Canada | 902 620 9753 | jeremybrownpei@gmail.com

PROFESSIONAL SUMMARY

Dedicated Senior IT professional with over 20 years of experience in the analysis, design, development, and technical consultation of complex enterprise web applications and legacy systems. Proven track record of providing high-level technical leadership, mentoring junior team members, diagnosing critical software issues, and maintaining mission-critical applications. Expert in HTML/CSS, SQL, PHP, Angular, relational database administration, and experience with PowerBuilder, .NET (C#/VB). Experienced in deploying secure production releases and managing database performance, security, and maintenance.

CORE TECHNICAL SKILLS

- **Programming & Frameworks:** PowerBuilder, PHP (Symfony, Laravel), .NET (C#/VB), Python, Nodejs, GO.
- **Databases & Administration:** SQL, MySQL, PostgreSQL, Relational Database Design, Performance Tuning, Data Modeling.
- **Web & UI:** HTML5, CSS3, JavaScript, jQuery, Angular, Bootstrap.
- **Systems & DevOps:** Linux Administration, Docker, Apache, Backup Server Administration, Production Deployments, Secure Protocols (OpenSSL).
- **Methodologies:** Systems Analysis, Technical Consultation, Project Planning, Comprehensive Build & Process Documentation.

PROFESSIONAL EXPERIENCE

Workers Compensation Board of PEI

Programmer Analyst | Charlottetown, PE | 2026 – Present

- **Application Support:** Contribute to the senior-level support, maintenance, and enhancement of WCB business applications and internal production systems.
- **Problem Analysis:** Analyze technical issues, troubleshoot complex problems, and implement reliable solutions in collaboration with team members.
- **Process & Standards Alignment:** Develop a deep understanding of WCB business processes, workflows, and technology standards to ensure strict compliance.
- **Continuous Improvement:** Contribute to continuous improvement efforts and the delivery of stable, reliable technology services across the organization.

Fresh Media

Senior Web Developer / Systems Analyst | Charlottetown, PE | 2006 – 2026

- **Technical Consultation & Leadership:** Provide senior-level technical consultation, systems analysis, and ongoing troubleshooting for high-traffic applications and internal E-Services.
- **Systems Development:** Deliver full-lifecycle systems development support by analyzing complex requirements, designing secure solutions, coding, testing, and enforcing strict documentation standards.
- **Legacy Modernization:** Actively maintain, stabilize, and modernize legacy database applications, ensuring long-term system uptime and data integrity.
- **System Integration & Server Admin:** Developed utilities to bridge gaps between internal systems and Microsoft-based data sources; provide backup server administration and support for database and application servers.
- **Security & Compliance:** Manage server-side security protocols, encryption (OpenSSL), and secure data transmissions.

A.V. Knowles

Contract Programmer / Principal Systems Architect | Laventille, Trinidad | 2015 – Present

- **Senior Leadership & Architecture:** Serve as the principal technical authority and consultant, providing senior leadership to direct technical strategy, mentor team members, and mitigate architectural risks.
- **Legacy System Overhaul:** Spearheaded and led a comprehensive legacy system overhaul for the custom enterprise management platform, modernizing aging codebases and optimizing long-term system stability.
- **Analytical Problem Solving:** Diagnosed and resolved deep-tier technical problems within a custom enterprise management platform using highly developed analytical skills.
- **Database Management:** Oversee relational database performance, execution of complex data migrations, disaster recovery efforts, and strict data management protocols.
- **Deployment & Standards:** Lead the deployment of approved software releases to production environments while establishing comprehensive build, process, and training documentation.

Active Media Works

Contract Programmer | Toronto, ON | 2013 – 2022

- **Application Support:** Maintained and enhanced complex features for a custom merchandising and compliance tracking platform, optimizing user-facing administrative interfaces.
- **Testing & QA:** Performed rigorous functional testing, debugging, and coding for new feature releases to ensure cross-environment compatibility and adherence to industry standards.
